this guide is intended as a companion to planning policy guidance ppgs and subsequent planning policy statements ppss and aims

to encourage better design and to stimulate thinking about urban design the guide is relevant to all aspects of the built environment from the design of buildings and spaces landscapes to transport systems and for planning and development at every scale from streets and their neighbourhoods villages and cities to regional planning strategies

the publication of the green paper on planning has magnified the significance of urban design frameworks development briefs and master plans despite general recognition that making places socially economically and environmentally successful depends on high standards of urban design there is less understanding of how good design can be delivered the challenge is to influence the development process not only on high profile sites but wherever urban change is reshaping places

this companion to introducing urban design interventions and responses shows how the principles and concepts of urban design can be applied and implemented in a range of real world settings

this book deals with a wide range of techniques used in the urban design process it is invaluable for architecture planning landscape and surveying students and will also help professionals in the day to day practice a method of urban design is developed which has sustainability and environmental protection at the centre of its philosophy previously literature regarding the urban design method has been almost totally neglected this book introduces the topic to the reader a number of techniques are illustrated by example or case study where techniques are discussed they are located within the structure of the design process the book develops a logical framework for a process which includes problem definition survey analysis concept generation evaluation and implementation it is this framework which is presented here as a discourse towards the development of an urban design method this book is a practical guide one that the authors themselves would have found useful as students or in the early years of their professional careers it is organized so that each chapter provides guidance which hitherto students and practitioners in this field have had to discover for themselves often with some difficulty since methods and techniques for urban design is a broad topic thinly spread in published form techniques illustrated by example or case study practical guide to urban design which covers a core subject for undergraduate degree courses techniques located within structure of the design process

rapid regeneration of city areas has placed the quality of urban design high on public and policy agendas worldwide planning for urban quality examines the achievement of quality in the urban environment in a planning context tracing urban design from its roots the authors draw on both historical and current practices to examine the key physical political and economic forces at play and the social pressures and impacts brought about by both failures and achievements in urban design this highly illustrated critique of towns and cities draws on examples from across western europe south africa and usa to examine both public and private sector development practices controls and fiscal policies within a diverse range of localities the authors indicate the need for a reinstitution of region provincial approaches for closer co ordination bewteen sectors and revised fiscal policies in planning and development in order to enhance the quality of urban social experience and environments providing a deeper understanding of the many diverse strands of urban quality the authors provide a firm basis from which to analyse urban planning achievements and to assess the relevance and value of urban scapes

overcrowding noise and air pollution long commutes and lack of daylight can take a huge toll on the mental well being of city dwellers with mental healthcare services under increasing pressure could a better approach to urban design and planning provide a solution the restrictions faced by city residents around the world during the covid 19 pandemic has brought home just how much urban design can affect our mental health and created an imperative to seize this opportunity restorative cities explores a new way of designing cities one which places mental health and wellness at the forefront establishing a blueprint for urban design for mental health it examines a range of strategies from sensory architecture to place making for creativity and community and brings a genuinely evidence based approach that will appeal to designers and planners health practitioners and researchers alike and provide compelling insights for anyone who cares about how our surroundings affect us written by a psychiatrist and public health specialist and an environmental psychologist with extensive experience of architectural practice this much needed work will prompt debate and inspire built environment students and professionals to think more about the positive potential of their designs for mental well being

this introduction to the field of urban design offers a comprehensive survey of the processes necessary to implement urban design

work explaining the vocabulary the rules the tools the structures and the resources in clear and accessible style providing a comprehensive framework for understanding urban design principles and strategies the author argues that urban design is both a process and a collaboration in which the different forces involved are knit together moving from the regional scale down to the scale of places the book examines the goals and strategies of the urban designer from the viewpoints of the private sector public sector and community the text is illustrated throughout with photographs and drawings that make theory and practice relevant and alive

this is the first book to address the design needs of older people in the outdoor environment it provides information on design principles essential to built environment professionals who want to provide for all users of urban space and who wish to achieve sustainability in their designs part one examines the changing experiences of people in the outdoor environment as they age and discusses existing outdoor environments and the aspects and features that help or hinder older people from using and enjoying them part two presents the six design principles for streets for life and their many individual components using photographs and line drawings a range of design features are presented at all scales of the outdoor environment from street layouts and building form to signs and detail part three expands on the concept of streets for life as the ultimate goal of inclusive urban design these are outdoor environments that people are able to confidently understand navigate and use regardless of age or circumstance and represent truly sustainable inclusive communities

the author uses his experience as an urban designer in new york city to examine the nature of city planning and how it can improve urban life

introducing urban design interventions and responses is a new departure in the town planning series under the editorship of clara greed the dynamic new subject and profession of urban design straddles the fields of town planning architecture landscape architecture and transport planning this book recognises that a key feature of modern urban design practice is the ability to integrate a concern with the visual and aesthetic aspects of urban form with a strong social awareness of the need of user groups

plus a sensitivity to wider environmental and sustainability issues in this it continues the themes already introduced in earlier volumes such as the changing nature of the profession social problems and the means of implementing policy written by a team of eminent urban designers architects and planners under the joint editorship of clara greed and marion roberts the book introduces the reader to the subject through a discussion of current issues approaches and user responses introducing urban design interventions and responses is an ideal resource for undergraduate courses in town planning architecture landscape architecture estate management and housing studies it is also suitable as an introductory text for first year diploma and masters programmes in urban design and suitable for rtpi rics cioh ciob asi isva and riba courses and will be of interest to professional practioners in the urban design field
