from the beginning the systems research movement has shown a high
potential for offering a conceptual framework for the understanding of
social systems much of this potential has been realized but a major gap
remains with regard to operational investigative aids developments of the
last ten years with a method ological orientation and emphasis seem
finally to be filling this gap the purpose of this book is to describe the most
advanced of these developments and to make them available to a wider
audience the emphasis is on developments that are primarily oriented

toward interaction with expertise in the social sciences and that thus hold the most promise for social systems investigation in particular attempts have been made to provide substantiation and illustration of three main points 1 the common motivation and essential integrability that systems research provides for developments and considerations along a very broad spectrum of interests 2 the very diverse nature of the types and forms of considerations that may be meaningfully integrated and 3 the operational and usable nature that developments in systems methodology represent for research in the social sciences the book is divided into three parts with a generally increasing degree of specificity the first part chapters 1 2 and 3 deals with foundational issues associated with modeling and methodology as areas worthy of study in their own right

this book brings together a team of experts in the field of forensic psychology to demonstrate the scope of the discipline and the techniques employed in key areas of research policy and practice its aim is to go beyond the introductory texts on the subject to challenge perceptions to raise questions for research to pose problems for practice and to inspire and stimulate demonstrating the ways in which forensic psychology can aid the practice of criminal justice it will be essential reading for students academics and practitioners the book is divided into seven sections addressing key topics with which the discipline is concerned its broader context investigation and prosecution testimony and evidence correlates of criminality persistent offending intervention and prevention and punishment and corrections the contributors include both academics and practitioners and are drawn from the uk the usa and australia

physical therapy and rehabilitation research and clinical application offers a contemporary practice relevant overview of rehabilitation science and clinical care across major domains of physical therapy organized into four sections 1 neurological rehabilitation and neurotechnology 2 aging frailty and postural control 3 musculoskeletal rehabilitation and integrative care and 4 participation communication and patient centered outcomes the book highlights how mechanistic insight thoughtful assessment and evidence informed interventions can translate into meaningful improvements in function mobility and quality of life readers will explore key themes in neurorehabilitation and technology enabled therapy modern approaches to balance and postural control in aging populations integrative perspectives on musculoskeletal and chronic conditions and outcome focused rehabilitation that prioritizes participation communication and real world impact with clear clinical relevance and strong research foundations this volume supports clinicians researchers and advanced trainees seeking actionable concepts emerging directions and a patient centered framework for rehabilitation practice
